Full-stack and backend engineer with experience building scalable systems using Go, Laravel, Node.js, and Next.js. Skilled in designing microservices, optimizing performance, and integrating cloud and DevOps workflows. Passionate about solving complex engineering problems and delivering high-quality products in fast-paced, cross-functional teams.

Experience

Vocasia

Feb 2022 – Jul 2022

Back End Developer Intern

Jakarta, Indonesia

- Developed and integrated 15+ REST APIs, improving response time and enabling seamless communication between web and mobile clients.
- Resolved frontend API fetching issues for both React.js (web) and Flutter (mobile) applications.
- Debugged and fixed existing APIs, ensuring seamless functionality across platforms.
- Collaborated with the frontend team to ensure smooth integration between backend and frontend systems.

SMK Gajah Tongga

Aug 2024 – Nov 2024

IT Support Intern

Bukittinggi, Indonesia

- Managed and maintained student data using Excel and MySQL, ensuring data accuracy and security.
- Oversaw the maintenance and updates of the school's website, improving its functionality and user experience.
- Provided technical support to staff and students, resolving hardware and software issues promptly.

Freelance Web Developer

Aug 2024 – May 2025

Self-employed

Indonesia

- Built an e-commerce site for a local business using Next.js and PostgreSQL.
- Integrated third-party APIs and ensured seamless data handling between client and server.
- Worked closely with clients to understand requirements, propose solutions, and deliver projects on time.

ASI Asia Pacific (PeepI)

Jun 2025 – Present

Full-stack Engineer (Contract)

Jakarta, Indonesia

- Redesigned and developed the second version of the internal collaboration management platform using Next.js, improving performance, responsive design, and user experience.
- Restructured the back-end by decoupling a Laravel monolith into a standalone REST API server, increasing scalability and maintainability.
- Maintained and extended the assessor and admin system in Laravel, delivering 2 new features and integrating them seamlessly with existing modules.
- Optimized system performance by implementing Redis, RabbitMQ, and Laravel Jobs for background task processing.
- Designed and maintained a microservice architecture between the main application and automated report generator for reliable data flow.
- Developed and maintained the client request portal, building the backend in Go with PostgreSQL and RabbitMQ as the message broker to synchronize requests across internal systems.
- Built an AI assistant to help users retrieve candidate reports graded by assessors through natural language queries.
- Containerized applications and services with Docker to streamline development, testing, and deployment workflows.
- Led and mentored two Full-Stack Developer interns in building a fully responsive notification and assessment management application for assessors. Oversaw feature planning, architecture decisions, code reviews, and delivery of production-ready components.

Education

Padjadjaran University

Aug 2019 – Aug 2024

Bachelor of Computer Science, GPA: 3.60/4.00

Indonesia

- Concentrated studies in Web Development, Mobile Development, and Multimedia applications.
- Completed coursework in Data Structures, Algorithms, Database Systems, Artificial Intelligence, and Cybersecurity, building strong foundations for backend and full-stack engineering.
- Final Year Project: Designed and implemented a scalable Learning Management System using Node.js, React.js, and PostgreSQL, deployed on AWS and Alibaba Cloud.

Projects

Learning Management System (Final Year Project)

Aug 2023 – Aug 2024

Full-stack Developer | Node.js, Express.js, React.js, PostgreSQL, AWS, Alibaba Cloud

- Led the end-to-end development of a production-ready Learning Management System used by university students for digital marketing training, taking ownership of system design, development, deployment, and user onboarding.
- Collaborated with a lecturer to structure educational content and ensure the LMS aligned with academic learning objectives and real classroom needs.
- Built a scalable platform featuring course management, video learning, quizzes, task scheduling, discussion forums, and integrated video conferencing for remote classes.
- Implemented Redux for complex state management, Tailwind CSS for responsive UI, and deployed the system on AWS and Alibaba Cloud with a secure, high-availability setup.

Jobseeker Mobile Application

Oct 2021 – Dec 2021

Back-end Developer | Node.js, Express.js, MongoDB, React Native

- Built RESTful APIs with authentication and authorization, integrated with MongoDB for efficient data storage.
- Collaborated with frontend developers to ensure smooth API integration in the React Native mobile app.

Cultural & Culinary Tourism Marketplace Website

Feb 2022 – Jun 2022

Full-stack Developer | Node.js, Express.js, React.js, MariaDB

- Developed a tourism marketplace platform where users could explore cultural events and culinary services, with features such as service listings, booking, and search.
- Built and integrated a RESTful API with a React.js frontend for an interactive user experience.
- Implemented an admin panel for vendor and content management, using MariaDB for data storage.

Organisational / Volunteer Experience

BEM Kema Unpad

Feb 2022 – Dec 2022

Staff (Project Manager)

Indonesia

- Managed and designed social media content for BEM Kema Unpad, enhancing engagement and outreach.
- Led a team of designers and content creators to deliver high-quality social media campaigns.
- Coordinated with other departments to ensure timely execution of projects and events.

IASMA 1 Bukittinggi

Nov 2025 – Now

Head of Cycling Activities

Indonesia

- Appointed as the Head of Cycling Activities for IASMA 1 Bukittinggi, the alumni association of SMA Negeri 1 Bukittinggi.
- Responsible for planning, leading, and organizing cycling events across the Jabodetabek area, ensuring smooth execution and high participation from alumni members.

Technical Skills

Languages: Python, Java, C, PHP, Go, JavaScript/TypeScript, SQL, HTML5/CSS3
Frameworks & Libraries: React.js, Next.js, Flutter, Node.js/Express, Gin, Fiber, Laravel, Django, CodeIgniter 4, Tailwind CSS
Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ
Cloud & DevOps: AWS, Google Cloud Platform, Firebase, Docker
Tools: Git/GitHub, VS Code, Postman, Android Studio, XAMPP, Figma

Languages

- Indonesian: Native
- English: Professional Proficiency

Certifications

- IBM Back-end JavaScript Developer — Issued Mar 2025 (Credential ID: QPHN1N15MTTP)
- IBM DevOps and Software Engineering — Issued Mar 2025 (Credential ID: 4JW0WZW6HK1G)
- IBM Full Stack Software Developer — Issued Mar 2025 (Credential ID: EN4YH2V7K0TN)
- Google IT Support (Coursera) — Issued Mar 2025 (Credential ID: YWPST2RII3GZ)
- Google Project Management Certificate (Coursera) — Issued Mar 2025 (Credential ID: 3HQRICIPDE8OH)
